If your application crashes while uploading a file, follow these steps:

- 1 Ensure the file size is within the supported limit as specified in the technical documentation.
- 2 Verify that the file format you are trying to upload is supported by checking the list of supported formats provided in the documentation.
- 3 Restart the application to clear any temporary issues.
- 4 Update to the latest version of the application, as newer versions often include bug fixes and improvements for file upload functionality.
- 5 If the issue still persists after following these steps, please contact technical support for further assistance.

I couldn't find that information in the technical documentation.
